

The Blessings of Curses of Continuity

“Continuity is absolutely crucial for compelling, satisfying and powerful storytelling.

“Continuity stifles creativity and is overseen by a bunch of insufferable nitpickers.”

argument that storytellers and fans so often stake their passion and emotions on. Continuity, by definition, is fairly basic concept: this shit should make sense.

If a character has an empty gun, we better see him load it before he shoots and kills his enemy. If a story is set on cloudy winter night, we shouldn't witness someone squinting from the sunlight unless there's a good reason.

Heroine

You'd never guess it to look at me, but I'm totally badass, butt-kicking superhero.

"You?" you'd say, "Superhero?"

Okay, well, technically supper heroine if we're being all gender-specific about it. The point is that all it takes is one dose of

Valentine's Day

His eyes didn't make contact with the bartender, but rather some space above her head for a moment before lowering to the bar in front on him.

Heroine

You'd never guess it to look at me, but I'm totally badass, butt-kicking superhero.

"You?" you'd say, "Superhero?"

Okay, well, technically supper heroine if we're being all gender-specific about it. The point is that all it takes is one dose of Power Serum to transform me from boring old Laura Lerner with ratty hair and chewed up fingernails, too many freckles and a flat chest they don't even bother manufacturing bras for into a buff, stacked bronzed goddess with enough raw might to kick anv

You should see my costume.

It's hot pink spandex that starts halfway down my chest, wrapped tightly around my Double-D's, and runs down to the bikini line, leaving my thighs exposed to the knee where my jet-black boots start before finishing in three-inch stiletto heels.

I've got black gloves to match, going up to the elbow, and a pink eye mask that only covers my eyebrows and the top half of my high cheek bones.

My girlfriend Kitty tells me I look like a slut about to pop out of a cake.

I tell her she's just jealous that I can look smoking hot while beating any man in the world into submission and that my cleavage once distracted mad scientist supervillain Professor Malice long enough for me to cross his dungeon lair in a super-speed blur and level him with a haymaker that almost separated his skull from his spine.

What you think of the last movie? It was awesome. I was impressed with the cool effects. It had great action moves.

Does anyone know when the next sequel is coming? I hope Flash has big part in the next one...
